The English drama Lisa Jane Smith, author of an entire library shelf full of vampire diaries for literate tweens, has every right to feel like a whose throne is usurped in the first act of tragedy. She pioneered the genre, took a little sabbatical and returned to find her world dominated by Harry Potter and all these Twilight People. In 2008, The Vampire Diaries were reprinted in cool new covers and fonts, and L.J. Smith returned to writing. In the autumn of the The Vampire Diaries TV Show came to the CW, developed and produced by Kevin Williamson of Dawson's Creek fame. To his eternal credit, Williamson expertly preserves the kindness and sweetness of Smith's characters and situations. Although the vampires naturally want to seduce the sensitive young heroines into their dark world, the pretty little women bring the flesh-hungry evils into the light again and again. Of course, the show's production values leave plenty of room for good music and young people - there's no shortage of fog, but it also has a lot of attitude. In addition to predicting nasty events, the show's prophet can predict fashion trends. The story revolves around the eternal dilemma of a tween: wistful good girl falls in love with the good vampire brother, but is constantly tempted by an evil vampire-other brother. What should a girl do? Life hasn't been the same for Elena since the tragic death of her parents, but she's trying to pick up the pieces and support her troubled younger brother Jeremy. On her first day at Mystic Falls High School, Elena meets the mysterious new guy Stefan, and the two seemingly lost souls form an instant connection. What Elena doesn't know, however, is that Stefan is a vampire who constantly resists the urge to taste her blood. But Stefan, it seems, has a bigger evil to deal with when his dangerous older brother Damon turns up to devastate the city of Mystic Falls - and claim Elena for himself.
